

6S Light-Duty Shelving

Okamura's original boltless structure enables easy installation

okamura

FEATURE

6S Light-Duty Shelving is economical and ideal for small to medium-weight items. One unit withstands loads up to **1500kg**, and Okamura's original **boltless structure** enable easy installation. Extra shelving can be added easily to create a custom display.

Uprights are connected to each other and fixed securely with special fasteners.

Shelves are easily installed on brackets and are adjustable at a 25mm pitch to accommodate a range of item sizes. Assembly is easy—simply insert the brackets into slits on the upright.

Resin base plates protect your floor from scuffs.
